

CPC438 - Junior Urbanist

Location:	London or Milton Keynes
Reporting to:	Digital Planning Team Lead
Working Hours:	Full Time
Equal Opportunities:	We strive to be an equal opportunities employer and commitment to this process will be expected.
Closing date:	22 nd July 2021

Purpose of the role

The team provide deep understanding of the intricacies of how cities work today – existing processes, tools, policies, governance and culture – and a vision of how they will change in the future. The Junior Urbanist will support the wider built environment directorate in the delivery of projects, events and communications and thought leadership

Key Responsibilities

- Research and stay up to date with any legislative, academic and commercial developments in the planning and built environment industry, in the UK and abroad.
- Support wider teams to research and produce built environment related content to support the delivery of projects across the business.
- Utilise visual design skills to communicate complex narratives in clear, visual and engaging ways.
- Support our events and communications team to develop and manage our internal and external communications, including writing blogs, articles and developing content for presentations.
- Support our SME team to help identify partners, support new businesses and help shape projects that will impact the built environment and planning industry.
- You may be required to undertake any other reasonable duties to support the Catapult in achieving its strategic outcomes and ensure effective business operations.

Required skills & experience

- Qualification in town planning, architecture, urban design, architecture, engineering, or equivalent
- Professional experience in the planning or built environment industry
- In-depth knowledge of one or more of either; infrastructure planning, development viability, housing capacity, Environmental Impact

Assessments, local plan monitoring, Transport Impact Assessments' planning enforcement or similar.

- Ability to communicate effectively; through visual as well as written and verbal means with project partners, industry leaders and external stakeholders.
- Strong and demonstrable visual design skills to communicate concepts in clear, visual and engaging ways.

Desirable

- Experience in communicating about the built environment through means such as blogs, or visual presentations
- An understanding of future trends and technologies that are changing cities
- An overview of the current technological tools being used in urban planning
